(Unaudited – Prepared by Management)
FEBRUARY 29, 2008

1. BASIS OF PRESENTATION

The consolidated financial statements contained herein include the accounts of Gold Canyon Resources Inc. and its wholly owned subsidiary, Gold Canyon Resources USA Inc. (the "Company").

These interim consolidated financial statements have been prepared by the Company in accordance with Canadian generally accepted accounting principles. All financial summaries included are presented on a comparative and consistent basis showing the figures for the corresponding period in the preceding year. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of annual financial statements. Certain information and footnote disclosure normally included in annual financial statements prepared in accordance with Canadian generally accepted accounting principles has been condensed or omitted. These interim period consolidated statements should be read together with the Company's audited consolidated financial statements and the accompanying notes for the year ended November 30, 2007. In the opinion of the Company, its unaudited interim consolidated financial statements contain all adjustments necessary in order to present a fair statement of the results of the interim periods presented.

2. NATURE OF CONTINUANCE OF OPERATIONS

The Company is considered to be in the exploration stage with respect to its interests in mineral properties. Based on the information available to date, the Company has not yet determined whether the mineral properties contain economically recoverable ore reserves.

The recoverability of the amounts comprising mineral properties is dependent upon the confirmation of economically recoverable reserves, the ability of the Company to obtain necessary financing to successfully complete their exploration and development and upon future profitable production.

These financial statements have been prepared in accordance with Canadian generally accepted accounting principles with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. Its ability to continue as a going concern is dependent on obtaining continued financial support, completing public equity financings, or generating profitable operations in the future.
