#### **Description of Business**

Gold Canyon Resources Inc.’s primary business is the acquisition, exploration and development of properties containing or thought to contain valuable minerals. Presently the Company’s exploration efforts are focused in Ontario, Canada and the State of Nevada in the United States. The Company is currently exploring four projects ranging from early through advanced exploration stage projects. These projects are; Springpole Gold Project; Cordero Gallium Project; Favourable Lake Project (silver – poly metallic); and the Bear Head Uranium Project.

**Springpole Gold Project** - The Springpole Gold Project is located about 70 miles (115 km) northeast of the town of Red Lake, in the Red Lake Mining District, in the district of Kenora in northwestern Ontario. The Company is in the exploration stage with respect to its interests in this mineral property which consist of 220 claims and cover approximately 20,000 acres. The Company maintains 100% control of all claims through leasehold interest and direct location. The Company successfully completed an aggressive 30,000 foot core drilling campaign confirming the presence of a high-grade, structurally controlled gold system during the 2004-05 winter drilling season. In addition, the Company has identified multiple new areas of mineralization including mineralization hosted in banded iron formations together with newly identified large areas of surface alteration very similar to that seen over known mineralization elsewhere on the property. The Company has commissioned a detailed three dimensional computer model being constructed in Gemcom to build a resource inventory, and to assist in the future exploration and development efforts. The 2006 winter program commenced February 27, 2006 which consisted of approximately 10,000 feet of diamond drilling. Drill results were released in April and May 2006.

**Cordero Gallium Project** – The Company controls a 100% interest in the Cordero Gallium Project by leasehold interest and direct location through its 100% owned subsidiary Gold Canyon Resources USA Inc. The project, located in north-central Nevada covering over 1,900 acres, is the largest known primary gallium occurrence in North America. On April 20, 2006, Reserva International LLC provided the Company with a National Instrument 43-101 compliant technical report and resource estimate. The complete technical report is available on the Company’s website ([www.goldcanyon.ca](http://www.goldcanyon.ca)) and SEDAR ([www.sedar.com](http://www.sedar.com)). The Company commenced a resource conversion drilling program in August 2006.

**Favourable Lake Project** - The Company acquired a 100% interest in the Favourable Lake; silver-poly-metallic property in August 2005. The property is approximately 120 miles (200 km) north of Red Lake, Ontario and consists of 268 individual claims units covering roughly 10,590 acres in the highly mineralised Favourable Lake Greenstone Belt. On December 22, 2005, the Company entered into a mineral property option agreement with Shoreham Resources Ltd (“Shoreham”). This agreement received regulatory approval on March 8, 2006.

**Bear Head Uranium Project** – The acquired a 100% interest in 30 claims covering approximately 7,770 hectares (19,200 acres) in the Favourable Lake Area of north-western Ontario from Red Lake prospector Mike Desmeules in July 2006.

## Performance Summary

The following is a summary of significant events and transactions that occurred during the nine month period ended August 31, 2006:

1. On December 6, 2005, the Company recovered \$14,273 of share issue costs related to private placements completed in the 2005 fiscal year.
2. On December 8, 2005, 275,000 options exercisable at \$0.36 per share expired unexercised.
3. On December 29, 2005, the Company completed a brokered flow-through private placement of 1,142,857 units at \$0.35 per unit for gross proceeds of \$400,000. Each unit is comprised of one common share and one half of one share purchase warrant. One full warrant will allow the holder to purchase one additional common share at \$0.45 per share expiring June 30, 2007. The Company paid \$44,000 in finder's fees related to this private placement.  
  
In conjunction with the above, the Company also completed a non-brokered flow-through private placement under the same terms as outlined above for 146,000 units for gross proceeds of \$51,100. Finder's fees of \$2,828 were paid on this private placement.
4. On December 29, 2005, the Company granted 275,000 stock options to directors, officers and consultants exercisable at \$0.25 until December 29, 2007.
5. On January 16, 2006, 269,000 options exercisable at \$0.43 per share expired unexercised.

7. On January 27, 2006, the Company paid US\$40,000 and reimbursed \$23,500 of costs to amend the Caley property lease agreement (See Note 5).
8. On February 27, 2006, the Company commenced its 10,000 foot winter drill program on the Springpole Gold Project. The drill program was specifically designed to address two principle objectives. The first, to conduct additional drilling in specific areas to fill gaps in the existing drill pattern identified during 3D computer modeling. This drilling will include work in the Main, Vein and Camp Zones as well as exploring the East Extension Bonanza along trend, down rake and down dip. The second objective was to explore promising new targets identified by the Company as a result of its ongoing property-wide exploration modeling and field work completed during the 2005 Summer Field Season. These areas include significant new targets situated both within, and external to, the Core Area. The first set of results on 8 holes were release on April 13, 2006 with bonanza grade results on the Core Area which included 8.0 feet at 1.518 ounces per ton gold in hole BL06-356. The second and final set of results were released on May 16, 2006.
9. In March 2006, completed and closed two private placements for a total of 2,684,825 units at (US)\$0.25 per unit for gross proceeds of (US)\$671,206. Each unit consists of one common share and one non-transferable share purchase warrant entitling the holder to purchase another common share at (US)\$0.40 for two years (1,050,000 expiring March 13, 2008 and 1,634,825 expiring March 31, 2008).
10. On March 1, 2006, the Company received \$25,000 and 250,000 common shares of Shoreham Resources Ltd.(valued at \$37,500) ("Shoreham") pursuant to the mineral property agreement for the Favourable Lake property. Another 250,000 common shares (valued at \$35,000) were received on July 1, 2006. As at August 31, 2006, the Company recognized a net gain of \$26,740 on the recovery of acquisition costs of \$70,760 on the Favourable Lake property.
11. On March 8, 2006, the Company was notified by Shoreham that it received regulatory approval for its option agreement with the Company for the Favourable Lake Property in the Red Lake Mining Division in Northwestern Ontario and that Shoreham would begin work shortly. Shoreham can earn a 60% interest by making certain payments over a four year terms as originally disclosed in the Company's news release dated December 22, 2005.
12. On April 6, 2006 closed and completed a non-brokered flow-through private placement of 1,875,000 common share units at a price of \$0.40 per unit for gross proceeds of \$750,000. Each unit consists of one flow-through common share and one half of a warrant, where a one whole warrant will be exercisable into one common share at a price of \$0.50 per share until October 5, 2007.

13. On April 20, 2006, the Company announced that Timothy Carew of *réserva* INTERNATIONAL LLC delivered an independent National Instrument 43-101 compliant Technical Report and resource estimate for its Cordero Gallium Project located in Humboldt County, Nevada. Based on 82 drill holes completed by the Company, Mr. Carew estimates resources at Cordero to contain 337,360 kilograms of gallium in an indicated category and 384,640 kilograms of gallium in an inferred category.
14. Held its Annual General Meeting on April 27, 2006. All proposed resolutions were passed, including the newly adopted shareholder rights plan (“the Plan”). Under the Plan, the Company has issued one right for no consideration in respect of each outstanding common share of the Company to all holders of record on March 15, 2006. All common shares issued by the Company during the term of the Plan will have one right represented by the certificates representing the common shares of the Company. The term of the Plan is ten years, subject to reconfirmation at the 2009 and 2012 annual meetings following the adoption of the Plan.
15. On May 16, 2006, the Company announces that it appointed Douglas B. Buchanan as a legal and strategic advisor to the Company. Mr. Buchanan is the National Managing Partner of Davis & Company LLP, a major Canadian law firm with offices in 8 cities including Vancouver, Toronto, Montreal, Calgary and Tokyo. Mr. Buchanan practices in the area of mergers and acquisition, project development and project financing, with emphasis on the infrastructure and natural resource sectors in Canada and internationally.

Significant changes in key financial data from 2004 to 2006 can be attributed to the Company adopting a new accounting treatment of using the fair value based method of accounting for all stock-based compensation starting in the 2003 fiscal year end. This results in a higher reported net loss figure whenever the Company grants stock options. The Company has also been increasing its mineral property costs each year by incurring exploration related costs on its Springpole Gold Property. Funding for the property has been accomplished through the completion several equity financings starting in December 2003.

## Liquidity

The financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing in the future.

	August 31, 2006	November 30, 2005
Working capital	\$ 527,356	527,616
Deficit	(8,451,234)	(7,615,102)

Net cash used in operating activities for the period consists primarily of the operating loss and a change in non-cash working capital.

Net cash used by operating activities during the period was \$510,237 compared to net cash used of \$320,273 during the previous comparable period.

Financing activities provided net cash of \$2,173,893 during the current period and \$2,644,396 during the previous comparable period from the issuance of common stock.

Net cash used in investing activities was \$1,750,123 during the current period and \$2,845,185 in the previous comparable period. Cash was expended primarily on exploration work on the Springpole and Cordero properties and the acquisition of the Favourable Lake and Bear Head claims.

These transactions were in the normal course of operations and were measured at the exchange value which represented the amount of consideration established and agreed to by the related parties.

## **Financial Instruments**

The Company's financial instruments consist of cash and cash equivalents, receivables, accounts payable and accrued liabilities, and amounts due to related parties. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial instruments. The fair value of these financial instruments approximates their carrying values, unless otherwise noted.

The fair value of amounts due to related parties is not determinable as they have no specific repayment terms.

## **Critical Accounting Policies**

The financial statements have been prepared in accordance with accounting principles generally accepted in Canada and form the basis for the following discussion and analysis of critical accounting policies and estimates. The Company makes estimates and assumptions that affect the reported amounts of assets, liabilities and expenses and related disclosure of contingent assets and liabilities during the course of preparing these financial statements. On a regular basis, the Company evaluates estimates and assumptions including those related to the recognition of stock-based compensation.

Estimates are based on historical experience and on various other assumptions that the Company believes to be reasonable. These estimates form the basis of judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from those estimates.

## Subsequent Events

The following events occurred subsequent to August 31, 2006:

- a) Effective September 20, 2006, the Company appointed Mr. Vincent Della Volpe as a director of the Company subject to regulatory approval. Mr. Della Volpe has been granted 200,000 stock options at \$0.30 expiring two years from the date of grant.
- b) On October 10, 2006, the Company announced that it has confirmed the widespread presence of scandium associated with gallium at its Cordero Gallium Project, Humboldt County, Nevada, USA. Scandium is a valuable metal, generally produced in small amounts as a by-product of uranium processing. It is a silvery white, soft metal used primarily as an alloy in the production of high strength aluminium.

*Cautionary Note to United States Investors Concerning Forward Looking Statements - The future conduct of the Company's business and the feasibility of its mineral exploration properties are dependent upon a number of factors, and there can be no assurance that the Company will be able to conduct its operations as contemplated. Certain statements contained in this release using the terms "may", "expects to", "projects", "estimates", "plans", and other terms denoting future possibilities, are forward-looking statements in accordance with the Private Securities Litigation Reform Act of 1995. The accuracy of these statements cannot be guaranteed as they are subject to a variety of risks that are beyond our ability to predict or control and which may cause actual results to differ materially from the projections or estimates contained herein. The risks include, but are not limited to, the risks described in the above press release; those risks set out in the company's disclosure documents and its annual, quarterly and current reports; and the other risks associated with start-up mineral exploration operations with insufficient liquidity, and no historical profitability.*
