

**May 9, 2007****NEWS RELEASE****GOLD CANYON RESUMES DRILLING
AT CORDERO GALLIUM PROJECT**

Gold Canyon Resources Inc. (GCU: TSX-V) (“Gold Canyon” or “the Company”) is pleased to announce the resumption of drilling to complete the Stage 1 resource conversion and delineation program at the Company’s Cordero Gallium Project, located in Humboldt County, Nevada, U.S.A. Cordero is recognized as the largest known primary gallium occurrence in North America.

Ten reverse circulation drill holes for a total of 3,000 feet (915m) are planned to determine the continuity of gallium and other rare metals and rare earth element mineralization between the Corderito and SW Extension areas. (Please refer to the map, “SW Extension / Corderito Areas” located on our website www.goldcanyon.ca under “Latest News”.) Drilling is scheduled to resume on May 10, 2007. Gold Canyon anticipates using the results from the completed Stage 1 drilling to update the NI 43-101 compliant resource estimate for gallium at Cordero. These results will also update the Cordero geologic model and define the relationship between gallium and other rare metals and rare earth elements identified in Stage 1 and the previous drilling campaigns.

This program is being conducted under the supervision of consulting geologist, Samuel Nunnemaker. Mr. Nunnemaker is a Registered Geologist and Qualified Person under the NI 43-101.

About Gold Canyon Resources Inc.:

Gold Canyon is engaged in the acquisition and exploration of mineral and precious metals properties. The Company controls a 100% interest in the Springpole Gold Project, the Favourable Lake Poly-metallic Project and Bear Head Uranium Project in the Red Lake Mining District of Ontario, Canada. Through its wholly owned U.S. subsidiary, Gold Canyon Resources USA Inc., the Company controls a 100% interest in the Cordero Gallium Project situated in Humboldt County, Nevada, U.S.A.

Certain statements contained in this news release using the terms “may”, “expects to”, “projects”, “estimates”, “plans”, and other terms denoting future possibilities, are forward-looking statements in respect to various issues including upcoming events based upon current expectations which involve risks and uncertainties that could cause actual outcomes and results to differ materially. The future conduct of the Company’s business and the feasibility of its mineral exploration properties are dependent upon a number of factors and there can be no assurance that the Company will be able to conduct its operations as contemplate and the accuracy of these statements cannot be guaranteed as they are subject to a variety of risks that are beyond our ability to predict or control and which may cause actual results to differ materially from the projections or estimates contained herein. The risks include, but are not limited to, the risks described in the above press release; those risks set out in the company’s disclosure documents and its annual, quarterly and current reports; the fact that exploration activities seldom result in the discovery of a commercially viable mineral resource and are also significant amounts of capital to undertake and the other risks associated with start-up mineral exploration operations with insufficient liquidity, and no historical profitability. The Company disclaims any obligation to revise any forward looking statements as a result of information received after the fact or regarding future events.
