## GOLD CANYON OVERVIEW (TSX-V:GCU)

Gold Canyon Resources is a Canadian-based company engaged in the acquisition, exploration and development of precious and rare metal properties.

### SPRINGPOLE GOLD PROJECT

- 100% control of 20,000 acres in the Red Lake mining district of Ontario, Canada
- NI 43-101 Resource Estimate published (November 2006)
- multiple zones of high grade gold mineralization, including Hole BL04-319 which averaged 3.046 opt Au over 19 feet
- data compilation of past 25 years and the latest technical review clearly demonstrates strong potential of the deposit as well as the critical path forward
- multi-phase exploration program has been outlined
- 2010 Winter drill program results include 3.3g/t over 64m in Portage Zone
- 2010 Summer program in place (June 2010)

### HORSESHOE ISLAND PROJECT

- 100% control of the property adjacent to Springpole
- the Project received:
  - 145 historical diamond drill holes totaling 24,139 metres
  - airborne and ground geophysics surveys
  - humus geochemical surveys, prospecting, mapping and trenching
  - MMI sampling program
- NI 43-101 Technical Report published (January 2009)

### FAVOURABLE LAKE PROJECT

- located approximately 200 km (120 miles) north of Red Lake, Ontario and covers approximately 17,000 acres in the highly mineralized Favourable Lake Greenstone Belt
- the Company acquired 100% interest in the Project in August 2005
- Shoreham Resources Ltd. exercised the option to acquire 60% undivided interest in April 2009

## KRATZ SPRING REE PROJECT

- GCU / Japan Oil, Gas and Metals National Corporation (JOGMEC) joint exploration agreement is directed towards identification of Rare Earth Element (REE) resources
- the JV has obtained an option to evaluate and lease tailings and mine dumps originating from Iron Oxide Copper Gold (IOCG) +/-REE deposit in the U.S.
- the JV enters into Multiple Non-Disclosure Agreements on REE prospects throughout Scandinavia
- the JV expands the scope of work with over \$1M budget for 2010-11 fiscal year

## CORDERO GALLIUM PROJECT

- the largest known primary gallium resource in North America
- 100% control of 1,900 acres
- updated NI 43-101 Technical Report and Resource Estimate (January 2008)
  - 713,930 kg gallium measured and indicated
  - 334,590 kg gallium inferred
- gallium is a critical element in our technology reliant daily lives
